

Geek Chic

Geeks and fashion: Time was, those words were the very definition of mutually exclusive. But as any geeky dyke worth her Dr. Who companions fan club card will tell you, times are a-changin.' Geeks have never been more in the zeitgeist; at long last our shameful socially awkward passions have made their way up from our mother's basement, out of the cosplay convention halls and onto runways. Comic books, mathematics, anime, video games, sci-fi and tech have merged with design to create a geek-approved aesthetic that has captured the imaginations of professional and DIY couturiers alike. Here are 10 of the hottest geek-inspired fashions, calculated to give you a plus 5 towards looking fierce.
